DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I (claims 1-8) in the reply filed on 4/27/2006 acknowledged. The Examiner withdraws the previous Election /Restriction requirement after further consideration of the instant application. However, this application contains one or more distinct independent claims therefore, a new restriction is set forth herein below.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, drawn to the first embodiment, the manufacturing process according Fig 1.

Species II, drawn to the second embodiment, the manufacturing process according Figs. 2.

Species III, drawn to the second embodiment, the manufacturing process according Figs. 3.

Species IV, drawn to the second embodiment, the manufacturing process according Figs. 4A-4C.

The species are independent or distinct because they required different search that is independent one form the other.

Art Unit: 2823

3. Applicant are required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none generic.

4. Applicant are advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicants traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The inventions are distinct, each from the other because of the following reasons:

5. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
